Monthly Performance Report

CEO's Note

Mr. Kamal Manocha

Dear Investors,

October marked a fascinating divergence. Globally, uncertainty and fear continue to dominate headlines — reflected vividly in gold prices hitting an all-time high of \$4,053 per troy ounce. Yet, amid this global caution, India's domestic story is one of growing confidence and acceleration. The Indian economy appears to be decoupling from global headwinds, powered by structural strength, stability, and resilience.

The rupee held remarkably steady, depreciating a mere 0.11% despite a 2.1% surge in the US Dollar Index — a testament to the Reserve Bank's vigilance and the revival of foreign inflows. With inflation contained and lending rates easing by 24 basis points in September, the macro environment is fueling growth across credit-sensitive sectors like real estate and autos. This strength was reflected in the markets too, with the Nifty 50 and Sensex rising nearly 4.5%, underpinned by robust corporate earnings. Listed companies reported a 12.3% year-on-year profit growth against a 6.1% rise in sales — a clear sign of expanding margins and operating leverage.

Even more promising is the structural shift unfolding beyond the metros. Rural and semi-urban India are leading a new wave of consumption, with two-wheeler registrations soaring 53.8% year-on-year, and over 60% of that growth coming from the hinterlands. This is not merely a festive bump — it's the long-awaited payoff from years of government-led infrastructure spending, now translating into tangible prosperity across Real India.

Our mission remains unchanged — to democratize high-quality investment knowledge and empower investors with clarity. We're grateful to every investor who has believed in us and our philosophy. Your trust continues to inspire our pursuit of innovation, creativity, and truth in an industry that often rewards noise over nuance.

The road ahead is exciting. India's growth story is only just beginning — and so is ours.

The Data is indicative and as of 30th Sep 2025. Taxation in AIFs is different for Long only vs Long short and depends upon portfolio construct and structure.

The returns shown are defined as: *** Post Exp & Tax, ** Post Exp, Pre Tax, ## Gross returns, ### Post Exp & Pre Perf.Fees & Tax, ^^ Post Exp & Tax and Pre Perf Fees; # Below 1 Year returns are Simple Annualized.

Reading & understanding performance numbers appropriately is important. AIFs are governed by private placement norms. This is for general understanding. Do read the full disclaimer on the last page.

Returns upto 1 year are Absolute and above 1 Year are CAGR

Understanding Alternatives: The Alpha Classroom

Wealth doesn't just like to grow; it likes to grow smartly. High Net-Worth Individuals (HNIs) already know how to make money. The real art lies in making that money behave. And for that, two sophisticated tools dominate the wealth management scene: Portfolio Management Services (PMS) and Alternative Investment Funds (AIFs).

These aren't your everyday mutual funds. They're more like the VIP lounges of the investing world with exclusive entry, personalized strategies, and a quiet promise: "We'll treat your capital with more respect than the market usually does." But what makes HNIs turn to PMS and AIFs? The short answer: diversification with dignity. The long answer? Let's get into that.

Diversification

HNIs understand what retail investors often don't, i.e., diversification isn't about owning 20 mutual funds that all hold the same 10 large-cap stocks.

Real diversification involves mixing strategies, asset classes, and styles to balance risk and reward.

That's where PMS and AIFs enter, like the well-dressed disruptors they are. The Best PMS in India 2025 offers personalized equity portfolios managed by professional fund managers who actually look at balance sheets and not just social media sentiment.

Meanwhile, the Best AIF in India 2025 gives access to unlisted equities, private credit, venture capital, and long-short strategies that go far beyond traditional markets.

PMS (Portfolio Management Services)

HNIs prefer PMS because it feels like getting a suit stitched instead of buying one off the rack. The Best PMS company in India doesn't sell "products"; it designs portfolios aligned with each investor's risk profile, liquidity needs, and financial goals.

These portfolios typically invest in 20–25 well-researched stocks, offering higher conviction (and sometimes higher volatility) than mutual funds. The difference?

AIF (Alternative Investment Funds)

While PMS handles listed equities with precision, AIFs invite investors into spaces mutual funds can't reach. Think of private equity, pre-IPO opportunities, real estate, structured credit, and even long-short hedge strategies.

However, the Best AIF in India 2025 isn't about taking reckless bets; it's about accessing markets where inefficiencies still exist. For HNIs, this means getting exposure to high-growth private companies before the rest of the world even hears about them.

Understanding Alternatives: The Alpha Classroom

Strategic Balance: The PMS + AIF

The ultimate strategy is when PMS and AIF are used together. It's the financial equivalent of combining logic and imagination. PMS ensures stability through direct equities and transparency, while AIF adds growth potential and tactical depth.

HNIs often use PMS as their "core" portfolio (considering how long-term, disciplined, equity-focused it is), and AIF as their "satellite" allocation (considering how dynamic, alternative, and high-opportunity driven it is). This structure not only smooths volatility but also opens up new return avenues without taking blind risks.

Risk Management

HNIs don't diversify out of fear; they diversify out of foresight. A PMS helps them manage market risk with active rebalancing, while an AIF adds diversification against traditional equity volatility.

For example, private credit AIFs can offer steady yields even when markets wobble, and venture capital AIFs can create asymmetric returns during bull runs.

The Best PMS company in India often collaborates with AIFs to construct multi-asset portfolios that behave differently across economic cycles. So, instead of reacting to volatility, HNIs position themselves to profit from it.

Global Diversification with Local Expertise

Modern HNIs are increasingly using PMS and AIFs not just for domestic diversification, but also as gateways to global opportunities. Some AIFs allocate to international equities or private markets, blending Indian growth with global resilience.

Wrapping Up

Here's the thing: HNIs don't necessarily have better instincts. They just have better systems. They use platforms like PMS AIF WORLD to compare, analyze, and invest with precision.

They look beyond surface returns and focus on risk-adjusted performance, portfolio construction, and manager accountability. In short, they do their homework or let data-backed platforms do it for them.

That's why they don't chase the market. They structure it. By combining the analytical strength of PMS with the alternative depth of AIFs, they build portfolios that grow consistently, protect during downturns, and evolve with markets.

Because wealth, after all, isn't just about returns. It's about control, calm, and the quiet confidence of knowing your money is working harder than the headlines.
